

FIGURE A3: Effect of Eq. 30-7 on spectral shape (shown for $S_1 = 0.6g$, $S_s = 1.5g$)

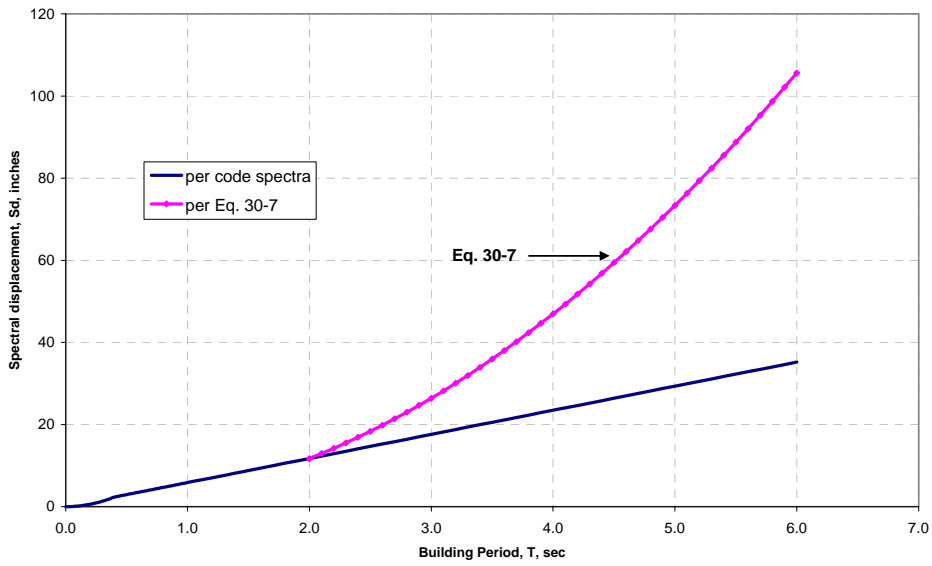

FIGURE A4: Effect of minimum base shear formula Eq. 30-7 on displacement demand (shown for soil type B, $S_1 = 0.6g$, $S_s = 1.5g$)

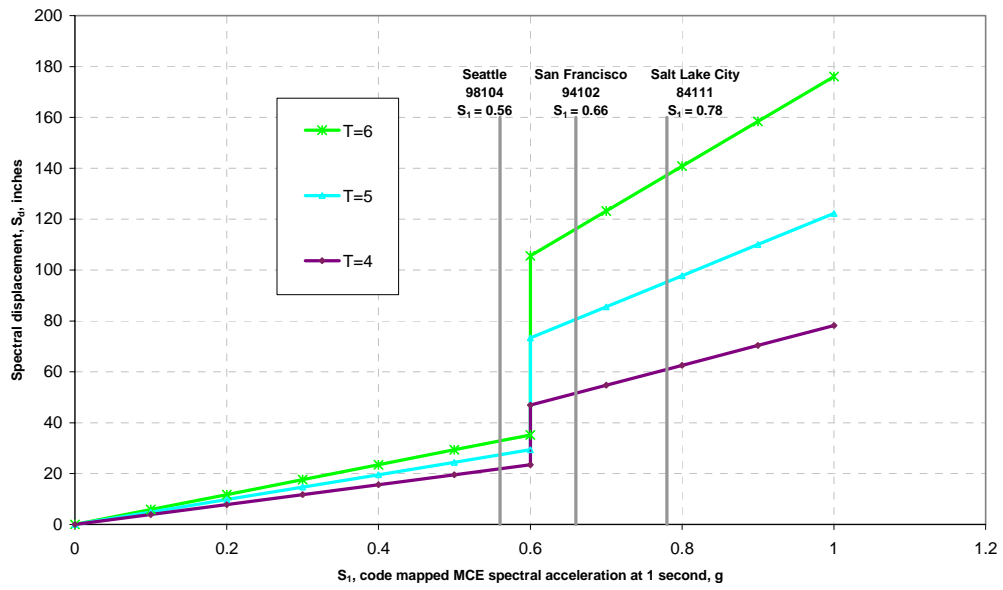

Figure A5: Comparison of displacement demands specified by ASCE 7-05, which control design of drift-governed, long-period structures (soil type B shown)
